

How to Get Your Doctor Onto Carie!

Carie has arrived! Over the next 90 days Team Carie will be working round the clock to get all of our new doctors on board. There are several steps you can help assist your doctor with in order to get him/her ready for platform access. The steps (which can be done in any order) are outlined below.

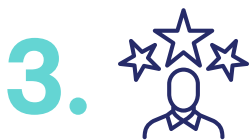

1. Create your Carie Account!

Start the Carie enrollment process today by registering for a provider account. Once you create an account, there are a few more steps that will take place before going live. See below!

2. HealthShare Credentialing

Next up is credentialing! We are working with HealthShare in order to get all of our doctors credentialed and ready to start taking consultations on the Carie platform.

3. Practice Philosophy + Headshot

Each doctor will receive their own Carie Doctor Page where they'll be able to sign up patients, schedule consultations, and promote their specialties and background. In order to complete this page, we'll need a 100 word quick Practice Philosophy to use as your bio. In addition to this we will also need a headshot to place front and center on their page.

Once these 4 major tasks are complete, Team Carie will begin taking the final steps in order to take the Doctor Page live.
